

DRINO ALERT in Georgia AN INVASION HAS OCCURRED ACTION NEEDED

Voter integrity is dead in Georgia due to a weak Governor and spineless Rino's/Democrats never to be seen again until 2029 at the earliest as it sits now! Unless it's content gets inserted by substitute to another bill.

CALL your senator/representative and get the content attached to by substitute SB175

"drino" can refer to a **bright green, very thin snake**, about one meter long, that lives primarily in trees of large forests and rarely on the ground.

Tachinid - *Drino*

Drino is a genus of parasitic flies in the Tachinidae family, known for being effective biological control agents against various lepidopteran caterpillars. These flies, particularly [*Drino inconspicuides*](#), are ovoviviparous, laying eggs on hosts that hatch within 1 minute, after which larvae create a "funnel" and a protective "cloak" to survive host defenses.

Georgia politics refers to a RINO republican acting liking a democrat that can strike in less than a minute and cloak itself in the establishment" protective subterfuge and suck the life out of a bill.
